

South Africa and Mauritius have more competitive business landscapes than Brazil, India and Russia

The World Economic Forum's Global Competitiveness Index (GCI) measures the competitiveness of the business landscape of 148 economies based on 12 pillars on a 7 point scale. The 2013-2014 report found that South Africa and Mauritius are more competitive than Brazil, India and Russia. Rwanda and Kenya also score in the top 100.

Goods Market Efficiency (GME) is one of the 12 pillars used to measure the GCI. A high GME score implies that healthy market competition exists such that the exchange of goods is clean and efficient. Mauritius, South Africa, Zambia, Rwanda and Liberia have more efficient goods markets than China, India, Brazil and Russia.
